

מצוות  
עשה  
#106

 This mitzvah includes all of the halachos of Tumas Zavah, and does not have a specific posuk we learn it from.

Today we review a *mitzvah* about the *tumah* of a *Zavah*, a woman with a certain kind of sickness. She can make other things *tomei*, like by touching them or moving them. We need to follow the *halachos* of the Torah that tells us when she becomes a *Zavah*, and when she makes other things *tomei*.

## Rambam: Hilchos Keilim

### PEREK YUD-CHES

In this *perek* we learn that a clay *keili* is only *tomei* if it is a *Klei Kibul* — it has a place to hold things inside.

### PEREK YUD-TES

The Rambam teaches us about when a clay *keili* is broken — when are the pieces big enough that they are counted as their own *keilim*?

### PEREK CHOF

This *perek* is about things that are attached to a clay *keili*, to know when they are counted as a *keili* by themselves.
